Plugging Abandoned Water Wells

Video Produced by

Texas Cooperative Extension
and the
Texas A&M University System

Executive Producer
Bruce Lesikar
Craig Caldwell

Producer
Jerrold Summerlin

Graphics and Animation
Angel Fattorini

Editing
A.R. Moore

Video Made Possible by

Texas Natural Resource Conservation Commission
U.S. Environmental Protection Agency

Additional Support for the Video

Texas Agricultural Experiment Station
Texas State Soil and Water Conservation Board
Texas Department of Licensing and Regulation
USDA National Resource Conservation Service
Texas Alliance of Groundwater Districts
Texas Water Development Board
Texas Rural Water Association
Texas Farm Bureau
San Antonio Water System
A special thanks to the following people for providing input on the scope of the facilitator guide project

Cary Betz  
Texas Natural Resource Conservation Commission

George Caldwell  
Texas Farm Bureau

Lee Parham  
Texas Department of Licensing and Regulation

Bo Spoonts  
Texas Department of Agriculture

Paul Tybor  
Hill Country Underground Water Conservation District and Texas Alliance of Groundwater Districts

Kevin Wagner  
Texas State Soil and Water Conservation Board

Funding for this facilitator guide project provided by

The Texas Natural Resource Conservation Commission

ACKNOWLEDGEMENTS

This publication was adapted from the  
“An American Farm Tale. Chronic Organophosphate Exposure and Treatment: The Rea Farm Case Study”  
document developed by

Rutgers Cooperative Extension  
N.J. Agricultural Experiment Station  
Rutgers, The State University of New Jersey  
New Brunswick

CONTENTS
I. INTRODUCTION ........................................................................................................ I-1

II. PROGRAM OVERVIEW
   Description of the Program ............................................................................. II-1
   Core Session .................................................................................................. II-4
   Texas Ground Water Resources Are Critical to Meeting Our Future Water Needs .... II-8
   Abandoned Wells Are a Threat to Our Personal Safety and Water Supply ........ II-9
   When is a Well Considered Abandoned? ..................................................... II-10
   Who Can Plug an Abandoned Well? ........................................................ III-1
   What Materials Can Be Used to Plug a Well? ........................................... II-12
   Well Plugging Steps .................................................................................... II-13
   How to Calculate the Volume of a Well .................................................... II-15
   How to Calculate the Disinfectant Needed for a Well .............................. II-16

III. SUPPLEMENTAL RESOURCES FOR FACILITATORS
   Planning Your Program ............................................................................... III-1
   Tips for Facilitating Discussion ................................................................ III-2

IV. HANDBOUTS
   Vocabulary .................................................................................................. IV-2
   Texas Groundwater Resources are Critical to Meeting Our Future Water Needs ...... IV-7
   Abandoned Wells are a Threat to Our Personal Safety .............................. IV-9
   Abandoned Wells are a Threat to Our Water Supply ................................ IV-10
   When is a Well Considered Abandoned? .................................................. IV-11
   Who Can Plug Abandoned Wells? ............................................................ IV-12
   What Materials Can Be Used to Plug a Well? ........................................ IV-13
   Well Plugging Steps .................................................................................. IV-14
   Well Construction Methods ..................................................................... IV-19
   TDLR Plugging Report ............................................................................. IV-21

V. EVALUATION MATERIALS
   Participant Program Evaluation ................................................................. V-2
   Facilitator Program Notes .......................................................................... V-3
   Evaluation Survey ....................................................................................... V-4
   Evaluation Survey Answers ...................................................................... V-5

VI. RESOURCES FOR FURTHER INQUIRY
   State and Local Agencies that Can Provide Information Pertaining to Well Plugging .... VI-2
   Groundwater Conservation District Map .................................................. VI-4
